

# WHEN TO CALL US

You soak  
**2 maxipads per hour**  
for  
**2 hours in a row.**

You're in pain and pain pills aren't helping.

Nausea, pain, fever,  
diarrhea, feeling sick  
more than 24 hours  
after taking misoprostol.

You're worried you  
may need to go to the  
hospital.

# WHAT TO EXPECT

## COMMON SIDE EFFECTS OF MIFEPRISTONE/MISOPROSTOL

Common side effects outside of cramping include nausea, weakness, vomiting, headache, diarrhea, dizziness, fever, and chills.

After you take misoprostol, cramping, bleeding and some side effects are normal.

## NORMAL BLEEDING AND CRAMPING

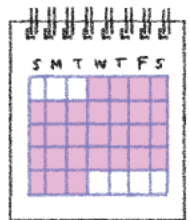

Some bleed a little.

Some bleed more than a period.

Some clots may be as big as a lemon.

You may have lighter bleeding for up to 4 weeks.
